

AGILITY EQUIPMENT CONTACTS & Weave Poles

A Frame \$600

Regulation Aframe like the one at Northcutt. Rubber finish. Comes with chains and the bar to hook it together. It may still have the wheels attached to move it on grass.

Teeter..... \$300

Regulation teeter. This is the old one we used before the clip-n-go. It adjusts by using a chain (included). It also can be held at regulation height by using a metal bar (included). It has a rubber finish.

Table ... \$50

This has the 3-way legs (I believe the heights are for 20", 16", 8"). It also comes with a separate set of 12" legs. It has a rubber top. The table height without the legs is 4".

Table ... \$20

This is a heavy table that was used in UKC. It comes with a set of legs. Heights of legs are unknown

Clip-N-Go Teeter board (cracked) ... \$20

This teeter board is cracked on both sides. At present, it is UNSAFE & UNUSABLE. In order to use it, someone would have to know how to weld aluminum and have a base since there is none with it.

WEAVES

Weave base ... \$40

This is a heavy metal base with 6 poles. It folds in the middle so is somewhat portable and would store easily.

Weave poles ... \$1.00 each

6 with purple tape (possibly need retaped)

5 with red tape (possibly need retaped)

6 with red & black tape (possibly need retaped)

12 white with blue tape at the top
